

Omar Antar

Full Stack Software Engineer

Riyadh, Saudi Arabia | omarantar520@gmail.com | +966 51 036 1005 | linkedin.com/in/omar-antar-github.com/omarantar7

Summary

Full-Stack Software Engineer specializing in building and shipping production web applications and SaaS products end-to-end. Experienced across the full lifecycle, **requirements gathering, system architecture, database and api design, backend and frontend development, and production deployment**. Proven track record owning projects independently, from designing scalable schemas and authentication systems to running CI/CD pipelines and production infrastructure. Core stack: **Vue, Nuxt, React, Next.js, Node.js, expressjs, Prisma, PostgreSQL, MySQL, Docker**, with a strong focus on clean architecture, maintainability, and sound software engineering principles.

Experience

Full-Stack Web Developer, CodenDot – Tripoli, Lebanon Nov 2024 - Jul 2026

- Delivered **10+ web applications** for approximately **8 clients**, including around **10 dashboards and CMS platforms**, collaborating with a team of 5 developers across development, deployment, and production maintenance.
- Developed the frontend of a **SaaS portfolio-building platform** end-to-end using **Vue and Nuxt**, implementing dashboards, CRUD workflows, advanced filtering components, and a portfolio builder.
- Integrated **REST APIs and Pinia state management** into Vue/Nuxt dashboards, connecting dynamic data with interactive views and keeping application state consistent across user workflows.
- Enhanced the company's CMS by implementing **role-based access control (RBAC)**, enabling clients to assign granular roles and permissions to employees and manage access to system functionality.
- Improved application performance by optimizing reusable frontend components and implementing an image-processing workflow that dynamically converts uploaded images to **WebP or AVIF**, reducing image size while maintaining visual quality.
- Introduced the company's first **CI/CD pipeline**, automating deployment workflows and reducing manual deployment effort across multiple projects.
- Contributed to **system and database design decisions**, optimizing queries for scalability and selecting SQL or NoSQL storage approaches based on application access patterns and query requirements.
- Implemented **customer and plan management workflows**, including status handling, advanced search, and filtering, supporting dynamic administration features across SaaS and CMS dashboards.
- Applied **SOLID principles and reusable software patterns** to improve maintainability, reduce duplicated logic, and make application features easier to extend.
- Investigated and resolved **production bugs**, maintained existing applications, and refined features based on client feedback to support reliable day-to-day operations.
- Handled **production deployments and releases** across multiple projects and participated in live client demonstrations to communicate progress, gather feedback, and align delivered functionality with business requirements.

Tech & Tools: Vue • Nuxt • React • Node.js • MySQL • Yii2/PHP • WordPress • Git/GitLab • CI/CD

UI/UX Designer, Encrypt Pty Ltd – Remote, Australia Apr 2023 - Mar 2024

- Designed responsive web and mobile interfaces, user flows, wireframes, and high-fidelity prototypes using **Figma**, translating business requirements into user-centered solutions.
- Collaborated with frontend developers during Agile sprints to deliver accessible, consistent interfaces and maintain reusable design-system components.

Tech & Tools: Figma • User Research • Prototyping • Design Systems • Responsive Design • Accessibility

Projects

Dental Clinic Management SaaS

Jul 2026 - Sep 2026

github.com/omarantar7/dental-clinic – dental-clinic.cc

- Independently delivered and maintained a **dental clinic management SaaS**, owning requirements gathering, system design, development, deployment, and production infrastructure.
- Designed and implemented the application architecture, translating business requirements into a **scalable database schema**, API architecture, authentication/authorization system, and typed frontend application.
- Built the backend, now in **production use**, using **Node.js, PostgreSQL, Prisma, and Docker**, implementing JWT-based authentication with access and refresh tokens stored in **httpOnly cookies**, alongside role-based access for doctors and secretaries.
- Developed the frontend using **Next.js, TypeScript, Zustand, React Hooks, and shadcn/ui**, building typed interfaces for patient management, sessions, payments, analytics, and administrative workflows.
- Integrated **Cloudflare R2** object storage for patient files and media uploads, providing scalable, cost-efficient **S3-compatible** storage.
- Implemented production infrastructure and deployment workflows using **Docker, VPS, Nginx, HTTPS/SSL, GitHub Actions, and GHCR**, automating application builds and deployments through CI/CD pipelines.

Tech & Stack: Next.js • TypeScript • React • Zustand • Node.js • PostgreSQL • Prisma • Docker • JWT • REST API • shadcn/ui • Cloudflare R2 • Nginx • GitHub Actions • GHCR • VPS

ChefBey

Apr 2026 - Jun 2026

github.com/omarantar7/chefbey – chefbey.org

- Independently built, deployed, and maintained **ChefBey**, a production multilingual website powered by a **custom CMS developed from scratch**, owning requirements gathering, system design, development, and deployment while enabling flexible content management and ongoing feature expansion.
- Implemented full **SEO support** across the website, including optimized metadata, page structure, and multilingual SEO, resulting in **all public pages being indexed and appearing in Google Search**.
- Developed multilingual support for **Arabic, English, and Turkish**, enabling the CMS to manage localized content across the website.
- Deployed and maintained the application in production using **Docker, Nginx, VPS infrastructure, HTTPS/SSL, GitHub Actions, and GHCR**, with an automated CI/CD workflow.

Tech & Stack: Vue • Nuxt • Pinia • Node.js • TypeScript • Docker • Nginx • GitHub Actions • GHCR • VPS • SEO • i18n

Education

Institut Technique Orthodox, Bachelor's Degree in Information Technology

2019 – 2022

- Technical education focused on information technology, programming, web development, databases, computer networks, and software development fundamentals.

Certifications

- **Software Engineering & System Design** – Software Engineering Excellence Academy SE²
- **Docker: The Practical Guide** – Academind
- **Clean Code** – Academind
- **The MERN Fullstack Guide** – Academind
